

Murray Elliot

Information Systems Development Manager, SAC (Scottish Agricultural College)
SIG Chair - Scotland

Murray Elliot comes from a software development background working in primarily high-tech industrial and commercial markets. Murray has been Information Systems Development Manager with SAC (Scottish Agricultural College) since 2005 and is in charge of SAP development, web development, applications development, applications support and corporate design functions. SAC implements SAP as a core system for almost all HR/MM/SD/FI/CO functions (plus various others!).

In 2006 Murray co-chaired the SAP User Group Scottish SIG and has since taken this role over. As a "new" SAP user, Murray looks forward to seeing what the future of SAP will potentially deliver for the organisation.
