

Gearoid Doheny

Business Systems Manager, Glanbia plc, based in Kilkenny, Ireland.
SIG Chair – Ireland

Glanbia have implemented a large SAP footprint across a user grouping of approx 1800 users over the last 9 years. The current environment includes R/3 4.7, CRM, BW, BPS, FSCM and Xi. There is a continuous challenge to identify and implement initiatives to leverage available content to add business value.

When the Irish User Group was re-formed in 2006, Glanbia were happy to be involved with the opportunities for networking, and building closer relationships between the Irish SAP user community, and SAP itself.

The Irish user group has developed well over the last two years, with meetings covering topics such as best practice in Procure to Pay, SAP R/3 upgrade roadmap and approach, BW , GRC and access control, and Solution Manager.
