

SAP UK & Ireland User Group Supply Chain Management Special Interest Group Re-Launch

Following a recent survey to identify ways in which the User Group, and in particular the SCM Special Interest Group, can be improved to create greater value for members, we are pleased to announce the SCM Group re-launch meeting will be held on 23rd March 2006.

We have identified opportunities to improve the structure of the UK SCM SIG as well as new initiatives and tools to create a more vibrant and value creating community.

The re-launch meeting has an exciting agenda including an announcement of the proposed new structure for the SCM special interest group and a workshop to identify areas of interest, providing you with an opportunity to influence the future direction of the group. Unipart have kindly agreed to host the meeting and are providing the opportunity for an interactive tour of their RFID Demo GEM facility.

We are also aiming to have a customer presentation surrounding an APO template solution provided by Diagonal.

For more information regarding the meeting, please visit the event details section of the UKI [SAP User Group](#) Website.

If you would like to know more about the user group and any planned activities please visit the UKI [SAP User Group](#) Website.
