# ShipERP Core

Fully Configurable Multi-Carrier Shipping Software for SAP ERP Users

A Natively-Integrated Parcel Shipping Solution for Greater Supply Chain Efficiency & Control

Made possible through the power of ShipERP Core, multi-carrier and multi-modal shipping integration for small parcel carriers is now consolidated on one SAP-native platform. Conduct rate quotes, track shipments, and receive Proof of Delivery for over 250 shipping carriers, all in your own SAP environment.

Because ShipERP Core is written completely in SAP's native programming language, ABAP, it can seamlessly integrate with your SAP ERP system without middleware. Our standard API library can be called within SAP, enabling rapid integration with your connected solutions.

Our technical team can enable a rapid integration with your existing systems in weeks, not months.

Deliverables

- Integration with 250+ shipping carriers
- Multi-carrier rate shopping & freight quoting
- Multi-carrier service selection & determination
- Shipment creation/cancellation within SAP
- Carrier label printing within SAP
