

Redefine how business gets done

Get the speed and flexibility of the cloud combined with enterprise performance and intelligence you won't find anywhere else.

SAP solutions delivered on Google Cloud equip your business to continually adapt and innovate. By combining the power of intelligent business applications, machine learning and advanced cloud technologies, your business can become smarter, faster, and more efficient. You'll be able to quickly and cost-effectively develop new ideas, and create new ways of working and engaging with customers, so you can reimagine what your business can do and stand out from your competitors. Together, we can help you redefine how business gets done — combining the speed and flexibility of the cloud with performance and intelligence you won't find anywhere else.

Intelligent

Enable new business models, new growth and deeper customer connections with intelligence and innovation across your business.

Flexible

Create a stronger, smarter and more nimble digital business at a pace and scale that fits your needs today and over time.

Trusted

Run your business with the confidence that your SAP data is safeguarded in a highly secure cloud trusted by billions of users.

All our systems survived Black Friday and worked well with no issues. It was the busiest day ever...broke all records for us and no system downtime. Wished we had moved earlier"

— Smyths Toys

Equip your business to continually adapt and innovate

By combining industry-specific business process expertise with intelligent and high-performance cloud, you can harness the power of advanced analytics, productivity, and machine learning technology in every part of your business.

Deliver smart, intuitive, personalized experiences

Tap into smart capabilities from machine learning and AI to a wide range of innovative services from SAP and Google.

Unlock business opportunities

Gain incredible insights through the combined power of SAP Leonardo and Google Cloud machine learning technologies.

Innovate faster

Accelerate your innovation with an open development platform backed by a vibrant community of developers and partners.

Move at your own pace

Ease your move to the cloud with flexible deployment options and cloud offerings and a simple pricing model.

Extend SAP solutions

Extend your SAP on-premise and cloud solutions with the power of SAP Cloud Platform on Google Cloud Platform.

Easy to scale

Easily develop, test and scale cloud solutions with intuitive and user-friendly tools and APIs.

Seamless connection. Integrated infrastructure.

SAP solutions are certified to run reliably and optimally on Google Cloud Platform and integrated to deliver maximum performance and reliability.

“

Google Cloud Platform and SAP HANA will help us reduce our maintenance costs and improve our flexibility. I think we will spend less time continually upgrading our infrastructure and more time improving our productivity.”

— FNM Group

“

We don't have to spend time taking care of our system so we can focus on creating value for our customers. With SAP S/4HANA and Google, we're able to deliver innovation with minimal disruption to our daily business.”

—Sovanta
