THE KEY TO UNLOCKING SECURE ROLE SOLUTIONS

Tango Technologies Ltd (TangoTec) is an official member of the SAP® PartnerEdge® open ecosystem. We are a trusted partner for secure, compliant, and highly efficient SAP operations, allowing you to bypass complex procurement hurdles with a formally recognised security partner.

About Us We specialise in guiding enterprises through complex SAP transformations and audits. By replacing manual guesswork with usage-driven precision and intelligent data modelling, we empower businesses to achieve audit-ready security frameworks, streamline access controls, and ensure strict regulatory compliance.

Our Services Our comprehensive SAP security suite includes Legacy Role Analysis, Role Redesign, FUE Exposure Optimisation, and Migration Execution. Our automated translation layer accelerates S/4HANA upgrades by mapping legacy ECC transactions directly to modern Fiori web tiles, completely eliminating migration bottlenecks.

Our Team Led by our founder, Andy Hartley, who brings 30 years of elite SAP expertise, we deliver unparalleled execution. Solutions are supported by hand picked senior technical engineers, entirely avoiding the project fatigue associated with junior hand-offs or generic templates.

Benefits of Working With Us Partnering with TangoTec guarantees a structured, automated migration with minimal business disruption. We perform pre-emptive, field-level risk analysis to catch Segregation of Duties (SoD) violations before roles are even built. Our disciplined use of advanced SU24 automation ensures your system access remains precise, scalable, and inherently secure from day one.

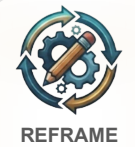

Solutions We completely automate your SAP Security transition from ECC to S/4HANA while actively minimising SoD risk. Our advanced tools analyse real-world transaction history to build lean role architectures, pinpoint dormant permissions, and integrate legacy frameworks without disrupting daily operations.

Why Us By safely decoupling what users *can* do from what they *must* do, we routinely slash unnecessary licence waste. We deliver a proactive, technical counter-audit that proves compliance with hard data. You gain the deep resources of a global systems integrator alongside the speed, lower overhead, and direct access of a specialist business.

Our Core Mission We provide expertly customised, secure solutions that drive smart cost reductions, defend against risk, with enhanced governance, to deliver a rapid, fully compliant audit result
