THE KEY TO UNLOCKING SECURE ROLE SOLUTIONS

CENTRAL is the strategic control hub that brings order, intelligence, and automation to complex SAP landscapes. As the Unified Command Centre for SAP governance it is designed for organisations that demand clarity, compliance, and operational efficiency. **CENTRAL** consolidates every aspect of SAP licensing, optimisation, and system governance into a single, intuitive platform. It replaces fragmented spreadsheets, manual processes, and inconsistent reporting with a modern, enterprise-grade command centre built for accuracy, speed, and audit-ready transparency.

A single pane of glass for your entire SAP estate **CENTRAL** provides a unified operational cockpit that connects seamlessly across Production, Quality, Development, Test, and Sandbox environments. It aggregates usage, licensing, and compliance data into one coherent view, eliminating the need for manual collation or system-by-system analysis. Administrators gain immediate visibility of their entire SAP footprint, enabling faster decision-making and more confident governance.

Intelligent licence management and contract control means **CENTRAL** acts as the authoritative source for all SAP licensing information. Supporting both **Full Usage Equivalent (FUE)** and **Named User** models, allowing organisations to manage hybrid estates and transition programmes with ease. Its built-in contract builder records agreements, pricing, capacities, and validity periods. Ensuring all licensing decisions are grounded in accurate commercial data. Automated ruleset ingestion streamlines the management of complex authorisation mappings, reducing administrative overhead and eliminating human error.

Advanced optimisation and user classification allows **CENTRAL** to apply intelligent weighting, usage analysis, and cross-system consolidation to determine the true licence requirement for every user. High-water mark logic ensures users operating across multiple systems are only assigned the highest necessary tier, preventing redundant licensing. Customisable waterfall thresholds allow organisations to safely downgrade over-licensed accounts, backed by demographic enrichment for precise departmental cost allocation.

Continuous digital access monitoring with **CENTRAL**, gains organisations full visibility of indirect access activity. Its document collection engine automatically captures and categorises Digital Access events across all connected systems, applying configurable multipliers for accurate financial modelling. Daily automated sweeps ensure uninterrupted monitoring, while technical-user filtering guarantees clean, audit-ready data.

Compliance, workflow governance, and audit assurance delivered by **CENTRAL** enforces structured approval workflows for licence changes, ensuring every modification is reviewed and authorised. Its automated reclaim engine identifies dormant accounts and initiates recycling workflows, reducing waste and improving licence hygiene. Every action is permanently recorded in an immutable audit ledger, capturing before-and-after values, administrator identity, and the reason for change, providing indisputable evidence for internal and external audits.

CORETX CENTRAL means control, clarity and compliance. Built for modern SAP landscapes whether supporting traditional on-premise estates or modern RISE/S/4HANA deployments, **CENTRAL** delivers the governance foundation organisations need to operate confidently. It provides the clarity, automation, and intelligence required to manage evolving licensing models, complex landscapes, and demanding compliance obligations. A single platform that unifies SAP governance, eliminates manual effort, and empowers organisations to make informed, defensible decisions with confidence.
