

# Strategic Choices Workshop SAP S/4HANA

*Learn how to plan your SAP S/4HANA Roadmap*

**AW** AGILITYWORKS

# TOGETHER

Transform and accelerate the way you operate  
with SAP S/4HANA and AgilityWorks.

## Strategic Choices Workshop

*Learn how to plan your SAP S/4HANA Roadmap*

The adoption of SAP S/4HANA will enable a significant shift in the way you do business, and how you run your business. There's much to think through before, during and after the transition, and many potential routes to move to a SAP S/4HANA landscape.

Understanding the technology, while developing a robust strategy and business case are critical steps to ensure you protect your previous SAP investment, and maximize new opportunities. This can be affected through a single step, or in a progressive way, extracting value from intermediate steps along the way. AgilityWorks can facilitate this process of discovery to ensure you make the right decisions early on, and to understand where value can be realised.

**Our SAP S/4HANA Strategic Choices Workshop covers the following key areas:**

- Understanding your longer-term goals and desired new business models
- Reviewing your existing SAP and non-SAP landscape & how best to 'sweat' your existing assets
- Strategic choices: Identifying the best SAP S/4HANA deployment approach for your business
- Where to get started with SAP S/4HANA – pragmatic tactics and activities

**For more details about this one day workshop, and to fix a date for your strategy session, please register on line.**
