soterion

We solve GRC for SAP companies of all shapes and sizes

Our entire business is focused on building GRC products that are a pleasure to use. Because companies differ, we've developed three ways SAP companies can handle their GRC, whatever their internal capability.

Software-as-a-Service

What is it?

Soterion's Compliance Cloud platform is a cloud based, pay-as-you-go GRC Access Risk tool.

Ideal for?

- Highly cost-sensitive companies.
- Companies that require access risk assessments seldom or ad hoc, e.g. internal auditors.
- Companies with basic in-house GRC expertise.

Benefits

- Instant GRC access risk visibility
- Easy-to-use
- Business-friendly reporting
- Extremely cost effective
- Only pay when you use it

Managed Service

What is it?

Combine 'on-tap' GRC expertise with Soterion's Compliance Cloud platform for a complete GRC solution. Delivered in collaboration with Soterion's Consulting Partner Network.

Ideal for?

Smaller companies who have a GRC requirement, but lack internal expertise.

Benefits

- Instant GRC capability, including both tools and expertise
- Give business hassle-free, complete control of access risks via dependable GRC service
- Significantly cheaper overall solution than employing in-house GRC expertise and purchasing GRC tool
- Proactive GRC management

On-Premise Software

What is it?

Soterion for SAP offers powerful, yet easy-to-use features for mid-sized and larger companies.

Ideal for?

- Companies that have a GRC requirement, and have internal expertise.
- Companies with IT policies requiring on-premise solutions.

Benefits

- Powerful, size-sensible GRC features without complex, unnecessary functionality
- Cost effective on-premise alternative
- Intuitive and easy to use
- Minimally invasive to infrastructure and SAP installation
