Testing Special Interest Group

29th September 2008

The Rutherford Room
Queen Elizabeth II Conference Centre, Westminster, London

AGENDA

09:00 Opening Session   Bob Bartlett
Competition and Book Reviews   SQS Group Ltd

09:15 Profit From Applying Lean Principles to your Testing   Brian Swain
Keynote session   Taki Group

10:20 Introduction to the SAP UK & Ireland User Group   Craig Dale
Presenting an insight to The SAP UK & Ireland User Group. The benefits of   SAP User Group
A corporate membership, and an update on the SAP UK & Ireland User Group
Conference in November.

10:30 Using the SAP Test Workbench in SAP Solution Manager v7   Paul Jackson
Enterprise Edition   SAP
During the Implementation/Upgrade project "solution information" will be stored
in SAP Solution Manager. This presentation will take a detailed look at how the
SAP Test Workbench can be used to support UNIT and SOLUTION Tests in the
latest release of Solution Manager (v7 Enterprise Edition). This will give a
recommended approach based on current project experiences. Awareness of the
latest functionality and recommendations will help you deliver an controlled and
efficient test.

11:00 Coffee and Networking

11:30 Applying Test Governance to SAP Projects   Gary Jenn
This presentation aims to show how some of the Test Governance Best   SQS Group Ltd
Practices can be applied to improve the quality of your SAP project. With
an industry moving to more complex and highly integrated systems and
infrastructure it is important to ensure mature delivery practices are used to
improve quality, efficiency and control of SAP project implementations.

12:15 Integrating automated testing tools into a SAP regression testing   Paul Carie
solution – A leading UK FMCG's experience.   Britvic
The aim of the presentation is to enable others to discuss and make informed
decisions on including automated testing tools as part of their testing strategy.
The presentation will achieve this by sharing the rationale for why the concept
of automation was embraced and by sharing the experiences and knowledge
that was gained through developing and putting in place an automated SAP
regression testing solution. The presentation will provide a critical look at the
processes and methodology employed to develop and integrate an automated
testing tool into a total SAP regression testing solution for a leading FMCG company.

13.00 Lunch and Opening of Exhibition   All

14:10 IT Productivity Governance and Procurement   Tim Willoughby
Keynote Session   TWLG-Ireland

SAP UK & Ireland User Group

Testing Special Interest Group

29th September 2008

The Rutherford Room
Queen Elizabeth II Conference Centre, Westminster, London

AGENDA

15:30   HP Software's approach to Quality Management for SAP   Colin Robb
        ensuring application quality, performance and security   HP

Over 86% of customers are concerned about SAP upgrade or implementation
risks due to lack of comprehensive testing (ASUG member survey).

This presentation will address this issue and cover the following:-

- Improvement of quality and reliability of applications
- Optimise performance and minimise system downtime
- Achieve on time & on budget go lives
- Standardisation and Management of the overall quality process
- Risk reduction during upgrades & implementations
- Clear Go-Live decisions

16:15   Market Research 2008 Trends in Testing and Quality   David Cotterell
                                                                       SQS Group Ltd

This presentation will be of interest to managers and practitioners to help them understand testing
and quality assurance as perceived by IT decision makers.

The presentation will focus on the recent research results sponsored by SQS and undertaken by PAC into the issues
surrounding Software Testing across Europe. Comparisons will be drawn with other research (past and present) to
highlight key trends in software testing activities and differences by geography. The core trends will focus on:

- The current approach and attitudes towards testing

- The impact of poor testing

- The use of third party testing skills - the outsource debate

- The impact of compliance and regulation on testing

- Testing tools and measuring testing
