SAP |
| 10:50 | Coffee & Networking | All |
| 11:20 | Material Requirement Planning (MRP) in SAP Business One
A short session on the MRP capabilities in SAP Business One and how to make the most of the functionality available. | Adam Pedersen
SAP |
| 12:00 | Open Forum, Questions and Answers, Trouble Shooting Session
With SAP experts on hand to answer your questions. | All |
| 13:15 | Lunch & Networking | All |
| 14:15 | eCommerce go
eCommerce go is a hosted eshop solution developed jointly by SAP, ePages and coresystems. This is a quick and inexpensive way of opening up a new channel through which you can promote and sell your products. You can synchronise all your products from SAP Business One to the webshop with a few clicks. Orders taken from the webshop are converted to sales orders in SAP Business One. The order status can be replicated onto the shop front in order for the customer to follow the progress of their order. | Dipan Shah
CoreSystems
David Edwards
ePages |
| 15:00 | Time recording and Billing
Coresuite time can be used to record and bill time together with expenses and materials. Standard reports show the productivity of the users based on time recorded (chargeable and non-chargeable) against contracted hours. You can view the time recorded from different perspectives by dynamically grouping the information on the screen. Furthermore you can now record the time using mobile devices such as the iPhone from Apple which is then synchronised to the SAP Business One system. This enables the user to record time instantaneously on site enabling efficiency and accuracy. | Dipan Shah
CoreSystems |
| 15:45 | Any Other Business and Close | All |
