

DB2 LUW Administration for SAP

AN IBM PROOF OF TECHNOLOGY

Date: Tuesday 15th March to Friday 18th March 2011

Time: 09:00 to 17:00 (start 09:30 on the first day)

Location: IBM Hursley, Winchester, UK

INTRODUCTION

This class provides students with all the information they need to be able to administer the underlying DB2 database of an SAP system. It does not assume any DB2 knowledge, but assumes students have some relational database knowledge.

OBJECTIVE

After completing this course, you will be able to

- Understand DB2 fundamentals
- Administer DB2 in SAP by using various SAP and DB2 tools to perform database monitoring, performance tuning, database layout, backup and recovery, etc.
- Understand unique DB2 strengths and features, and the deep integration with SAP, such as DPF, MDC and deep compression
- Understand various setup for high available system
- Be able to perform basic problem analysis

AUDIENCE

This class is intended for customers and business partners who have implemented or are intending to implement SAP running on DB2 for LUW.

COST

This session is offered free of charge.

Complimentary refreshments including lunch will be provided. However, participants are responsible for their own business travel expenses.

SCHEDULE

For your convenience, registration will begin at 09:30 on the first day. The session will start at 09:30 on day one (09:00 all other days) and end at approximately 5:00 PM each day (Friday finish time will be around 3:00 PM).

CONTACT FOR INFORMATION
