

## Analytics Symposium – Stream Information

### EPM & SAP Support

Time	Session	Company & Speaker
13:15-13:45	<p><b>EPM - Explore the evolving space of Predictive Analytics with a focus on improving your ability to Plan &amp; Forecast with SAP BPC.</b></p> <p>Predicting what the future might hold has never been more important than in today's fast moving and highly volatile world and in today's world of Enterprise Performance Management and Predictive Analytics, finance and the business community have more tools than ever to help them analyse and predict with greater levels of efficiency and effectiveness.</p> <p>In this session we explore the latest developments in predictive analytics offerings from SAP and how these can complement and add value to the existing SAP BPC (Business Planning &amp; Consolidation) applications your organisations are already using for deriving plans and forecasts. Complementary technologies that add real value to your business is what we will be demonstrating and there will also be use cases and client examples of the value that the approach can liberate.</p> <p>Column5 is the world's leading-edge consulting firm dedicated to providing high-value services that help customers leverage the power of SAP's Enterprise Performance Management (EPM) suite.</p>	David Jones and Sunil Kapur  Column5
13:55-14:25	<p><b>Early insights into SAP's latest EPM solution offerings.</b></p> <p>Earn more about the latest SAP EPM offerings i.e. SAP BPC 10.1 Embedded/Unified Model and SAP's Cloud For Planning solution.</p> <p>With the development of the SAP BPC 10.1 Embedded Model, SAP has expanded the way you configure this planning solution. This presents opportunities, but there are some important considerations to traditional BPC development approaches, especially relating to the front end tool choices - we will share our latest thinking coming from our BPC 10.1 Embedded Model implementation experience.</p> <p>SAP have recently launched Cloud For Planning – find out more about what this solution offers and how it is positioned against SAP's existing planning solutions.</p>	Shin Sawhney  CAP Gemini

<p>15:00-15:30</p>	<p><b>How can you socialise analytics into your business and maximise value out of it?</b></p> <p>Service and Support from SAP will explain how organisations can take a holistic view of their analytics infrastructure by considering a value driven approach, and the first steps needed to take them on the journey.</p>	<p>Jose Luis Carvalho</p> <p>SAP</p>
<p>15:45-16:10</p>	<p><b>How customers can lower their TCO by engaging with support</b></p> <p>This session will explain some of the tools and offering SAP Support provides to lower your TCO, how you can get more value from the maintenance contract you have in place with SAP and how you can accelerate the adoption of the innovations with Business Analytics. Specifically we will be looking at remote connectivity, Enterprise Support Value Maps – tailored to the Business Analytics lifecycle - and the new Product Engineer on Demand offering. We also provide some tips and tricks how you can speed up and escalate your issues</p>	<p>Harry Bodenhofer &amp; Joao Ribeiro</p> <p>SAP Support</p>
