

Analytics Symposium – Stream Information

Business Intelligence

Time	Session	Company & Speaker
13:15-13:45	<p>SAP Business Intelligence Roadmap</p> <p>Frank Prabel, Senior Director of Product Management at SAP will present SAP Business Intelligence Roadmap. In this informative session, you will hear about the core SAP BI roadmap, including Web Intelligence and the semantic layer. Understand the benefits of the upcoming BI4.1 SP06 and BI4.2 releases and how they can help you achieve your business goals. We will go into the details of the new upcoming features such as free-hand SQL, input control enhancements, BI variants or HANA access and will demonstrate a pre-release of those enhancements.</p>	Frank Prabel SAP
13:55-14:25	<p>Teradata Analytics for SAP® Solutions – a revolutionary approach to SAP Analytics – with the power of Teradata.</p> <p>Many of Teradata's 1,200+ customers use SAP to run their business. Many of these want a comprehensive view of data: encompassing SAP and non-SAP sources. Teradata provides a compelling approach to the analysis of SAP and non-SAP data in a way that delivers results in a vastly reduced timescale, in comparison to traditional methods. This session explains the mechanism for achieving this, via series of case studies, across a range of industry sectors: electronics, manufacturing, food, retail, oil & gas. If you're looking for a fresh approach to SAP analytics this is the session to attend.</p>	

<p>15:00-15:30</p>	<p>Maximising Self Service BI: How Tommy Hilfiger boost supply chain performance with Every Angle.</p> <p>Once Tommy Hilfiger started using the Every Angle SAP add-on and the business process transparency it provides, they were able to link the sales order book to the purchase order book and split purchase orders into parts due in short notice and in longer terms. By using this insight Tommy Hilfiger is able to reduce costs, while still having the products available on time.</p>	<p>Richard den Ouden</p> <p>Every Angle</p>
<p>15:45-16:10</p>	<p>BI Support Tool</p> <p>Matthew will demonstrate the next new version of the popular BI Support Tool. The new version has a completely new interface with many new features easing the setup and administration of the Platform. For example, Authentication setup Wizards, Notifications and alerts, Patch History and a Virtual BI Launchpad. The tool is a must for any BI Admin. Come and see what it could do for you!</p>	<p>Matthew Shaw</p> <p>SAP</p>
