AGENDA

- | | | |
|-------|--|------------------------------|
| 13:15 | LUNCH & NETWORKING | All |
| 14:00 | Optimise the Optimiser – An automated constraint planning approach in SAP APO | Rick Lambrecht
Olivehorse |
| | <p>A good constraint plan aims to provide a feasible plan with best value for the supply chain. The benefits of the Optimiser constraint planning approach is to ensure that such a plan is created by the system. Using the Optimiser does not have to be complex if you follow some basic rules. Olivehorse demonstrate some of the key differences between a heuristics and optimiser planning run, and how you can maximise your value when your network is constrained.</p> | |
| 15:00 | Any Other Business & Close | All |
