	<p>Join us for a fully interactive and digital experience that explores new possibilities to transform your business. We will be visiting SAPs brand new experience centre and you can Understand some of the Enterprise Asset Management capability that has been delivered in S/4 HANA 1610.</p> <p>Understand how SAP provides support to connect assets monitored by telemetry to enable an end to end business process with SAP asset data. The solution enables vast quantities of telemetry data to be streamed and stored in the SAP database platform. This combined with SAP Enterprise Asset Management data can be used to move from time based maintenance into predictive maintenance and process alerts and undesirable conditions in a connected way.</p>	Mark Pendery SAP
