Supply Chain Management

Special Interest Group

Meeting to be held on Wednesday 13th September 2017

At Manchester, Metropolitan University

AGENDA

13:20 Express Stock Dispatch

What is it? Operator led dispatch of finished goods using a handheld RF gun running a simple interface to SAP. Operator scans SSCC shipping label of each pallet manufactured, then scans a barcode next to the appropriate loading bay. When trailer is full a separate operation on the gun then dispatches the load. The gun captures the necessary details of the load, then to dispatch it fires the information to SAP which performs a background, STO create, delivery, pick & PGI.

Benefits are:

1. Automation and overhead reduction
2. Accuracy of what is on the load = what is in SAP, leading to no discrepancies on inbound tipping at our finished goods warehouse.
