Time	Session	Company & Speaker
14:00	**Sizing BI and SAP Lumira Software for Better Performance** Design Studio and Lumira have converged into a single technology with a single backend server component. How do you size and optimise this new technology? This session dives deep into the methodology for sizing Lumira 2.x. Amongst the topics include architecture, methodology, quick-sizer, load-balancing and memory management.	**Matthew Shaw** **SAP**
14:55	**Harnessing data to provide a single version of the truth.** In this session, James will detail how Agility Works are working with a well-known electricity provider to deliver an innovative reporting solution which consolidates group results for seamless real-time reporting. James will give you an insight into how SAP Cloud Platform and BusinessObjects (Design Studio) makes it possible le to have a single version of the truth, and most importantly, supports the possibility to change therefore keeping the solution relevant as the business evolves.	**James Rothwell** **Agility Works**
16:05	**Connecting SAP Analytics Cloud to SAP Universes** Connecting SAP Analytics Cloud to SAP Universe presents many questions. This session will provide a complete overview of the architecture, process flows, best practices and a demonstration. The session will focus on the 'live' connector meaning that no data is uploaded into the Cloud. The session will give you technical insights for how the Cloud re-uses you on-premise Universes.	**Matthew Shaw** **SAP**
17:00	**Enriching Financial Reporting using Web Intelligence** National Grid has committed to regrouping and re-aligning its financial reporting output into a standardised and feature rich report using the Web Intelligence toolset to enable effective management of costs. Many organisations struggle to overcome the challenges associated with this strategy especially in a high paced and fast changing environment whilst utilising existing technology and pushing the boundaries of the tool to its limits. In this session, we will take you through our journey	**Gary Marks & Singh Sukhdeep** **National Grid**

	and offer some insight into the challenges that we overcame to produce some highly engaging and informative Web Intelligence Reports.
