

User Experience Symposium

Mobile Breakout Stream Information

Time	Session	Company & Speaker
13:30	<p>SAPs Mobile Strategy For many executives, mobile opens the door to digital transformation, and a large part of that revolves around the UX benefits. This session will cover SAP's mobile strategy in 2018, and highlight updates to SAP's mobile technologies.</p>	<p>Aaron Ambrose SAP</p>
14:20	<p>Journey into low code development In this session Bluestonex will discuss different mobile options and the technologies.</p> <p>We will go into detail on SAP Screen Personas new slipstream UI5 engine demonstrating via mobile phones and tablets whilst discussing pro's and con's.</p> <p>We will show how to build a simple app using this technology without the need for UI5 skill, odata or ABAP.</p> <p>We can demonstrate how design thinking can help you make the right choice and demonstrate how Fiori and Personas can live together bringing a unified approach.</p>	<p>Dan Barton Bluestonex Consulting</p>
15:30	<p>Mobile Computing for Manufacturing Starting with a brief introduction to SABIC and its operations in the UK, Tony will provide background on SABICs SAP deployment then explain in more detail how they arrived at their current mobile solution. Tony will show how the solution provides support for both SAP and non SAP related activities. He will illustrate the process that was followed to take it through blueprinting, development and implementation, including change management and training and conclude with challenges encountered and future direction.</p>	<p>Tony Porritt SABIC</p>
