Gold Sponsor

Keytree is an international, award-winning business technology consultancy and product developer, creating exceptional Enterprise Digital solutions. We combine the best people, technology and innovation to design and build beautiful apps, solve complex integration challenges and provide cloud infrastructure, enabling companies to become leaner, faster and more agile. Keytree is a long-term SAP partner and market leader in SAP implementations including S/4HANA, SAP Hybris, SAP SuccessFactors and the SAP Cloud Platform. Our client base is multinational, crosses multiple sectors and includes Jaguar Land Rover, ARM, Greggs, BP and the UK Ministry of Justice.

IQX Business Solutions accelerate and control collaborative business processes, empowering Executives to make timely decisions, more confidently, with verifiable policy compliance. IQX software provides the platform for digital process automation. OneList Approvals enables cross-application decision task aggregation, mobile approvals and seamless system integration. Fiori AppBuilder (FAB) enables SAP customers to create their own workflow-enabled responsive Web Apps rapidly utilising existing in-house skills.

AgilityWorks adopts a collaborative approach to helping leading international organisations to shape and deliver digital transformation with SAP technology. Our clients expect us to advise, challenge and consult throughout the engagement, from the formation of strategy to solution delivery and support services.

Since 2007 we have built an enviable reputation for taking a fresh approach to delivering complex projects at scale, by combining top-tier consulting quality with the passion and focus of a specialist services provider. We combine the latest thinking on methodology with a combination of SAP Best Practice and AgilityWorks accelerators to achieve rapid realisation of better outcomes, offering our clients a thoroughly modern SAP services model designed for the era of digital applications and hybrid cloud architecture.

Our core expertise

- *SAP S/4 HANA and the Digital Core - Design, Deploy and Run Services*
- *Business Innovation through SAP Cloud Platform and SAP Leonardo solutions*
- *Data Analysis, Data Management, Data Governance and Data Migration*
- *Business Analytics and Insight*
- *Customer Engagement solutions*

We're Bluestonex, a SAP Partner consultancy based in Shropshire, United Kingdom. Formed in 2012, we bring together a new & specialised SAP consulting approach with specialist skills and competencies in SAP user experience, SAP ERP software & SAP digital innovation programmes.

We have always been obsessed with 'user experience' & 'human centred design' but back then we called it different things. The founders have lived long in the frustration of ERP systems and played a lot with user interfaces whilst trying to educate on carving out the most value from enterprise software.

We run our UX & design team(s) from the UK office with a focus on Fiori design principles in SAPUI5 and SAP screen Personas Technology. We are a build and service partner of SAP recently launching innovative software products for data processing and governance (SAP Maextro) for core SAP.

We are particularly proud of our unique consulting ethos which allows us to work collaboratively with our customers to design, develop, implement, and maintain SAP solutions that continually support and enhance their overall business strategy and objectives.

We help our customers realise the true value of investing in SAP technology through a design thinking led approach, allowing the foundations for greater business agility whilst providing a future platform for SAP driven business innovations.
