CREATE A TRIAL ACCOUNT FOR SAP CLOUD PLATFORM

Explanation	Screenshot
<p>You can request the trial account for SAP Cloud Platform in the Neo environment by going to the SAP Cloud Platform homepage at https://account.hanatrial.ondemand.com/.</p> <p>Click Register and fill all the required fields.</p> <p>The registration process is straightforward and self-explaining – but if you need help please follow the instructions in the Help documentation: Sign Up for a Trial Account.</p> <p>Result</p> <p>Your trial account in the Neo environment has been created. You are now on the Home > Europe (Rot) - Trial region screen. To navigate to your trial subaccount, click the <user ID> trial tile.</p> <p>The name of your new trial account contains the suffix trial, for example, p0123456789trial.</p>

INSTALL MOBILE CARDS APP

Explanation

Download the Mobile Cards app from [Apple Store](#) or [Google Play](#) to your phone. You may use these QR codes:

iOS:

Android:

ACTIVATE MOBILE SERVICES

Explanation	Screenshot
<p>In the SAP Cloud Platform Cockpit</p> <ol style="list-style-type: none">1. Choose Services on the left side2. Search for « Mobile Services, std »3. If this service is not enabled, click on “Enable” button.	<p>The top screenshot shows the SAP Cloud Platform Cockpit interface. The left sidebar is open to the 'Services' section. A search filter 'mobile' is applied, resulting in one service: 'Mobile Services, std'. The service is marked as 'Enabled' with a green checkmark. Below the service name, a brief description reads: 'Build and run mobile apps for B2E and B2B use cases.'</p> <p>The bottom screenshot shows the 'Service: Mobile Services, std - Overview' page. At the top, the service is marked as 'Enabled' with a green checkmark and a 'Disable' button. The 'Service Description' section explains that Mobile Services provides mobile access to enterprise information, including features like app content lifecycle management, push notifications, and support for offline apps. The 'Availability' section shows that the service is currently not available for Cloud Foundry and is available in the 'environment' for various regions: Brazil (São Paulo), Canada (Toronto), Europe (Rot), Europe (Rot - Trial), Japan (Tokyo), Russia (Moscow), US East (Ashburn), US East (Sterling), US West (Chandler), and Australia (Sydney). The 'Take Action' section includes links to 'Configure Mobile Services', 'Configure Mobile Services Cockpit', 'Configure Cloud Build', 'Configure Mobile Packager', and 'Go to Service'. The 'Additional Resources' section includes a link to 'Documentation'.</p>
