

Analytics Symposium

Digital Transformation Breakout Stream Information

Time	Session	Company & Speaker
13:30	<p>Next Gen Analytics & Road Map for transforming your business</p> <p>A practical guide for successfully delivering advanced transformational analytics within enterprises without HANA. This session will include a discussion of the common failure modes that result in 85% of Big Data Programmes failing, and will include a roadmap to success for new and distressed programmes to fully industrialise delivery within months.</p> <p>Separately it will also cover how advanced analytical transformation can be mobilised quickly within global enterprises without the need for SAP HANA. Enabling awesome solutions to be seamlessly integrated into ECC and non-SAP landscapes delivering real-time landscape analytics, IOT integration, Mixed Reality (AR), Blockchain etc. These great technologies can be augmented with your non-HANA SAP data and non-SAP systems to support real-time visibility of critical business processes including Global Asset/Freight Tracking, Digital Supply Chain, Enterprise Inventory Tracking, Global Base/Service/Operational tracking...and much more!</p>	<p>Dan Barlow</p> <p>Kagool</p>
14:20	<p>What's new in BW/4HANA 2.0 and what's happening with Project Blueberry</p> <p>Join the session to learn about the cool new features in BW/4HANA 2.0, as well as tips and tricks in upgrading from other versions of BW. Also, hear about the hot of the press progress of Project Blueberry as well as the BI Content and Extractor Roadmap for SAP Cloud based applications.</p> <p>This session details all the new features which have been released in BW/4HANA 2.0 including new Data Hub and re-modelling features, as well as new features for tighter SAP Analytics Cloud integration and upgrade. We then switch to Roadmap Mode, whereby we detail the new features planned within Project Blueberry as well as new features planned for the BI Content and Extractors for SAP Cloud Based Applications such as Success Factors.</p>	<p>Tim Dyer</p> <p>SAP</p>

Digital Transformation Breakout Stream Information

15:30	<p>How to Move Beyond Digital to True Business Transformation</p> <p>To be successful in an increasingly competitive marketplace, you need to look beyond digital transformation. The companies of tomorrow will be born digital and their first steps will be innovating on greater productivity, collaboration and customer service. How can you compete? By using process mining technology to transform the way you do business. Today.</p>	Andy Farmer Celonis
16.20	<p>How SAP are building a cutting-edge Data Science Platform for Machine Learning</p> <p>Join the session to learn about SAP's latest strategy in Data Science and Machine Learning. You'll get an understanding of what we are building and will be releasing very soon. You'll also see some of the latest innovations in action and know how/when you can get your hands on it.</p> <p>This session will start off by demystifying the topics of AI, ML and Predictive. It will then cover how we are building an open, industrial Data Science and ML platform. Then it will go into some of the recent innovations within the platform and some live demos of it in action. After this I will discuss how you can get your hands on it and next steps.</p>	Arun Godwin Patel SAP
