

Value Maps & Insights to Facilitate Decision Making

Time	Session	Company & Speaker
13:15	<p>SAP Analytics Cloud – a hands on DEMO</p> <p>Priti Mulchandani from SAP will deliver a hands-on demo of SAP Analytics Cloud – from importing a dataset and building a storyboard, right through to using the predictive features of the product. This will be an interactive session and if you plan to attend you should bring your own laptop to follow the demo step by step. Michael Moloney from SAP will also deliver a brief overview of the Analytics Solutions Value Map.</p> <p>Please note that this session will begin 15 minutes earlier than the other breakout sessions as this is a 1 hour session.</p> <p>If you would like to attend this session please email kirsten.boucher@sapusers.org to register.</p> <p>In this Hand-on session, users will discover and experience next generation Business Intelligence using SAP Analytics Cloud. Integrated with augmented analytics and smart visualization features, you can evaluate and predict business outcomes with this easy to use self-service solution in the cloud.</p> <p>Inside the workshop, you will create a BI story for analysing sales of a sample Bike manufacturing company 'BesRun Bikes'. You will also be able to build deep dive insights on the fly, trigger data correlation/ Influencers and run simulation using advanced BI capabilities in SAC.</p> <p>All you need is a 30day free trial account for SAC. A sample dataset for this workshop can be downloaded from this link.</p>	<p>Priti Mulchandani & Michael Moloney</p> <p>SAP</p>
14:20	<p>A Smooth Journey to SAP S/4HANA Cloud with SAP S/4HANA Cloud Value Map</p> <p>The SAP S/4HANA Cloud value map helps you to ensure your success in adopting and running SAP S/4HANA in the public cloud.</p> <p>This value map is designed to support customers through the entire product support lifecycle - from planning your cloud solution through go-live and continued optimization.</p>	<p>Jeremie Mallet</p> <p>SAP</p>

Value Maps & Insights to Facilitate Decision Making

<p>15:30</p>	<p>The Operations Control Centre</p> <p>To keep pace with the expectations of your customers, business partners, and employees in today’s digital economy, you must make decisions more rapidly and with greater confidence than in the past. Achieving this business transformation requires two things – firstly, immediate access to information that is timely, reliable, and insightful and, secondly, the ability to action the insight gained.</p> <p>Using the scenario of a leakage in the network, this live demonstration showcases how Utilities organisations can improve their ability to respond to a major incident in a customer-centric manner and dramatically reduce the time taken by employees to resolve the issue. The solution amalgamates the use of class-leading technologies within</p> <p>the context of total workforce management to drive measurable outcomes.</p> <p>It leverages structured and unstructured data from multiple sources (both SAP and non-SAP) to provide an end to end solution which is integrated into both front end and operational business processes and solutions. The solution, developed on SAP software and using AgilityWorks accelerators, demonstrates how the liberation of data into an intelligent platform can transform how you run your business.</p> <ul style="list-style-type: none"> • Live demonstration of the Operations Control Centre solution which leverages advanced analytics, geospatial capabilities, machine learning, telemetry data, social sentiment and external information such as traffic to demonstrate how the effect of a leakage in the network can be minimised • Developed on SAP Digital Boardroom, SAP Cloud Platform & SAP Analytics Cloud, the solution acts a unified platform for a range of personas within your organisation from C-level to Field Services Engineer • Enhances and optimises critical end to end business processes by driving the cycle of Data > Insight > Action in real time 	<p>Gareth Ryan</p> <p>Agility Works</p>
