

IOT Symposium

Meeting to be held on Thursday 23rd May 2019

The Vox Conference Centre

Resorts World, Birmingham, B40 1PU

09:00	REGISTRATION & COFFEE	ALL
10:00	Welcome & UKISUG Update Hear the latest User Group news.	Paul Cooper & Craig Dale, UKISUG
10:30	Unlock your Intelligent Enterprise with IoT and Machine Learning The spread of Internet connectivity among virtually every device around us has created the world of the IoT. Every device has an identity that can be tracked, monitored, given direction to, and received information from. SAP Leonardo IoT Products and Services enable organizations to embed IoT data and technology into almost any line of business solution one can imagine. Learn how SAP companies are leveraging it to introduce greater productivity and an array of new product offerings to their customers.	Ralf Vath & Larissa Limarova SAP
11:15	Coffee & Networking	All
11:45	Bringing the Digital Twin to life. Using SAP, IoT and Microsoft HoloLens to bridge the gap between the physical and the digital During this session Andy will introduce the concept of the digital twin and its cross industry applications, from asset management, field service, and training. The session will then go on to illustrate how itelligence have used SAP S/4HANA, IoT technology, the SAP Cloud Platform and the Microsoft HoloLens to create a "mixed reality" solution that bridges the gap between the physical and digital. Take service and maintenance scenarios to a whole new dimension. Accelerate Industry 4.0 initiatives within your business.	Andy Steer itelligence
