

# Data Symposium

## Data Governance

Time	Session	Company & Speaker
10:50	<p><b>Data Governance in Manufacturing</b></p> <p>Improving Data Management &amp; compliance remains a key priority for many technical teams and consultants, influenced heavily by the eventual data migration to S/4. What about ongoing governance? What about business rules? What about the skills required? In this session XP Power will relate their recent Master Data Management &amp; Governance project experience with their Data &amp; UX partner, Bluestonex Consulting. They will describe the transition from running a manual Material Master creation process (including manual set up MRP Areas, Inspection Plans, Inspection setup, Control Cycles, EWM data) that was extremely time consuming, to automating all these steps via the Maextro Data Solution. They will also discuss their roadmap, product selection for data management and decision rationale for Maextro.</p>	<p><b>David Maughan,</b> <b>Business Systems Manager</b></p> <p><b>XP Power</b></p>
12:30	<p><b>Data Value in times of protracted disruption</b></p> <p>This session will explain how a good data strategy can help drive data value and SAP's unique position with BTP to create data value.</p>	<p><b>Gerd Danner</b></p> <p><b>SAP</b></p>
13:05	<p><b>TBC</b></p>	<p><b>TBC</b></p>
