

	<p>Going back to how it was before if there's a possibility of operating differently, simply won't work. For the businesses that try, their employees will soon look elsewhere.</p> <p>In our presentation, Managing the Return to Work, we explore how businesses can create a new working environment that ensures your people are content and safe, and your business can run optimally and profitably - that process starts with your people.</p> <p>Showcasing the capabilities of SAP SuccessFactors, we will explore how the solution can help manage the return to work. Addressing some of the issues many businesses are facing today - maintaining employee engagement, understanding employee needs, onboarding new hires, as well as sustaining a collaborative team feel through remote working. Our expert will highlight the mobile functionality of SAP SuccessFactors, the embedded Qualtrics within the solution, and focus on the Onboarding, Learning and Employee Central Self Service modules. Understanding how SAP SuccessFactors can help manage the return to work will help you to build a business that will be best placed to succeed and flourish tomorrow.</p>	
12:45	<p>Discover how you can save on your BW/4HANA migration</p> <p>In this case study led presentation, Donal Geraghty, SeaPark Consultancy CEO, shares an approach that is helping companies save on their BW/4HANA migration. At a time when BW/4HANA migration has perhaps slipped down the order of important priorities it is worth noting that (i) the migration will require attention sooner rather than later and (ii) the longer companies 'kick the can' the higher the expense will be; both in terms of human and financial resource.</p> <p>Firstly, they recommend that a client reviews their entire BW system; the output of this activity allows you easily produce a decommissioning plan and renovate your BW system without having to manually identify what BW objects are surplus to requirement. In effect you can remove the frustrating, time-consuming, and expensive challenge of discovering BW objects no longer required for your BI solution.</p> <p>You will also know that the BW/4HANA migration project requires a substantial testing effort that, again, commands much in the way of financial and human resource.</p>	<p>Donal Geraghty SeaPark Consultancy</p>

	<p>Most automated testing tools require a time-consuming setup however using a specifically designed tool to automate the testing for BW/4HANA migrations, that can be set up in a single day, customers have reduced BW/4HANA migration testing by 40-60%.</p> <p>Join Donal as he shares some recent use-cases to clearly illustrate how all this has been possible.</p>	
13:25	<p>Setting a New Standard for Integrated Commercial Planning at Premier Foods</p> <p>Hear from Dan Flynn, IT Business Partner at Premier Foods as he highlights their improvement and standardisation of the commercial planning process that led to the recent implementation of SAP Analytics Cloud Planning. Dan will discuss:</p> <ul style="list-style-type: none"> • The need for a centralised planning and reporting process • The Premier Foods 5 key principles for commercial planning • The reasons for selecting SAP Analytics Cloud Planning • Highlights of the new connected planning model • Lessons learned • Future plans 	<p>Dan Flynn Premier Foods</p>
14:05	<p>Predicting HR flight risk using SAC</p> <p>Use SAP Analytics Cloud to Predict HR Flight Risk - SAP Analytics Cloud comes with some amazing features in the areas of Business Intelligence, Augmented Analytics, Planning and Predictive modelling. Using SAC predictive modelling the HR community can use employee information to understand more about who is likely to leave and do something about it before they leave. Join Dean Farrow who will run through a demonstration of using SAC to predict employees who are likely to leave.</p>	<p>Dean Farrow SAP</p>
