ABAP Developers Workshop

Thursday 28th October 2021

AGENDA

09:00	Introduction & Welcome	UKISUG & SAP
09:05	ABAP Platform: Extensibility Strategy <p>The session will focus on the different extensibility options that customers and partners are looking for: side-by-side extensibility with SAP BTP ABAP Environment, key-user extensibility and on-stack developer extensibility with SAP S/4HANA Cloud ABAP Environment. In addition it will explain the roadmap towards a unified code line approach for all ABAP extensions.</p>	Boris Gebhardt, Florian Wahl, Harish Bokkasam, Karl Kessler SAP
10:05	Comfort Break	All
10:15	Custom Code Adaptation for SAP S/4HANA and SAP BTP ABAP Environment (incl. usage data collection and analysis) <p>Learn how the Custom Code Migration app based on usage data collected by the transactions SCMON/SUSG helps you to assess your custom code impact and reinforce Clean Core principle during SAP S/4HANA conversions and migration to SAP Business Technology Platform and how you can significantly reduce your custom code adaptation efforts using Quick Fixes in ADT in Eclipse.</p>	Olga Dolinskaja SAP
11:15	Feedback & Wrap Up	All
11:30	Lunch	All
12:30	Welcome Back	UKISUG & SAP
12:35	Build and test modern Apps with the ABAP RESTful Application Programming Model (RAP) <p>The ABAP RESTful Application Programming Model (RAP) allows developers to efficiently build cloud-ready enterprise SAP Fiori apps and REST APIs on SAP S/4HANA and SAP BTP ABAP Environment – using the Core Data Services (CDS), behavior definitions and implementations for the transactional handling, as well as business services for the OData service exposure. Join us in this session and learn how to develop a transactional SAP Fiori app and write ABAP Unit tests to ensure its quality.</p>	Carine Tchoutouo Djomo, Volker Drees, Harish Bokkasam SAP
