

### **SAP UK innovation team offers a free one day Leonardo Technical Academy**

SAP is committed to helping every organisation to become a smart, best-run business and make the world run better. That said, the SAP UK innovation team offers a free one day Leonardo Technical Academy running every month until December 2019. This hands-on workshop will enable you to explore the latest SAP technologies and solve a social challenge. Teams will get the opportunity to assemble and write code for connecting a smart device to the SAP cloud platform.

Recent customer feedback:

'Genuinely one of the best sessions I've attended. Chatbot hands on was great. I came away feeling very educated and inspired to get creative.'

Please come and speak to the team on the SAP stand at the symposium to find out more.
